-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 1754

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-21 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the admitted prior art.

Applicants admit on pg. 4 of the specification that active carbons having high surface areas are old and known. No difference is seen in the present product versus the references discussed in the specification.

Claims 1, 2, 7, 9-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carugati et al. 5391534 taken with Landis 5695554.

Carugati teaches in col. 1 activating humic acid (which Landis col. 2 teaches is found from carbonized manure) to form a high surface area active carbon. Using poultry manure as the source of humic acid is an obvious expedient to avoid polluting rivers/watersheds from the waste and to provide an inexpensive source of carbon.

Concerning claim 10, 850 degrees is taught; the time and rate of contact with stream is a matter of optimization of throughput to assure complete activation; In re Boesch 205 USPQ 215. Ex. 1 of Carugati teaches washing the product. Claim 14 is deemed met when manure is used, as it is a natural material, particularly if activated with phosphoric acid as taught by Carugati.

The active carbon of Carugati makes claims 15-21 unpatentable; no difference is seen.

Applicant is reminded of their duty of disclosure. No IDS has yet been filed.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
